

Roy Quilor

Designer

Introduction

Hi, I'm a self taught designer who builds sites in CSS and HTML from Hertford UK.

After graduating in 2003, I became a freelancer for two years, worked with agencies and my own clients. Then worked full time in software company for five years creating digital asset management systems.

Took some time out to be with my daughter and work on side projects. Worked at a startup as a contractor to get experience on React JS.
